

The logo features a yellow curved line above the word "ACROPOLIS" in a bold, yellow, sans-serif font, all contained within a dark green rounded rectangular background.

ACROPOLIS

A top-down view of various military tactical gear items arranged on a dark green surface. The items include a large central combat backpack, several smaller bags and pouches, a tactical vest, a belt, and various accessories, all in a digital camouflage pattern.

TACTICAL GEAR

Body armor, plate carriers, load-bearing vests, combat backpacks, bags, pouches and weapon cases, medical equipment, tactical belts and accessories

ACROPOLIS

Since 1996, we believe in the power of quality craftsmanship. Acropolis is a Ukrainian company with a soul, where every thing is not just a product, but the result of sincere inspiration, many years of experience and close cooperation with those who appreciate comfort, reliability and style.

What do we produce?

Tactical equipment: *body armor, backpacks, medical equipment, stretchers, mats*

Equipment for outdoor activities: *hunting, fishing, mushroom picking, picnics*

And also: *city bags and backpacks, cases and accessories for glasses and much more*

Our principles:

- Unique design
- All products are author's developments
- Materials from leading manufacturers
- Functionality, thoughtfulness to the smallest detail
- Social responsibility
- Support for the Armed Forces, charity, openness

30 years of trust!

- In-house design department
- Testing of each product
- 250+ employees
- Modern equipment
- High standards of production organization
- ISO 9001:2015 and AQAP 2110:2016 certificates

AR-01 Modular body armor with a quick reset system in one move

AR-01 Modular Body Armor with Quick-Release System provides comprehensive protection for military personnel in combat environments. The design consists of eight separate components. Thanks to its modular construction, the vest can be configured to meet specific mission requirements. MOLLE compatibility allows attachment of pouches, bags, and additional equipment. The system supports both hard armor plates and soft ballistic inserts.

FEATURES:

- Modular design consisting of 8 protective components;
- Front and rear armor panels with pockets for hard armor plates and soft ballistic inserts;
- Height adjustment via adjustable shoulder straps;
- Chest circumference adjustment through laced cummerbund system;
- Full MOLLE coverage on the front panel for mounting tactical equipment;
- Hook Velcro panel on the upper front for ID patches and insignia;
- Inner lining made of tactical mesh and foam padding for ventilation and impact absorption;
- Emergency drag handle on the back panel;
- Cummerbund with MOLLE system and pockets for soft ballistic protection;
- Secure attachment of neck, shoulder, groin, and thigh protection modules;
- Ballistic collar protection height of no less than 5 cm;
- Load-bearing waist belt with suspenders, chest strap, and shock-absorbing padding;
- Full compatibility of all components with the MOLLE system.

Material: CORDURA 1500D, CORDURA 500D, CORDURA Hybrid, Polyester, mesh, 5–8 mm polyethylene foam

Size: S, M, L, XL.

ARP-02 Modular body armor vest

Modular body armour with full body protection and equipment storage. The perfect combination of mobility and reliability. Thanks to the MOLLE system, the vest can be flexibly adjusted to suit the task at hand. Supports hard and soft armour packs.

Material: CORDURA 1500D, CORDURA 500D, CORDURA Hybrid, 5–8 mm polyethylene foam, mesh.
Size: universal (S-XL).

FEATURES:

- Modular design allowing components to be added or removed as required;
- Full coverage of the front, back, sides, neck, shoulders, groin, and thighs;
- Protective cummerbund for lateral (side) protection
- Compatible with the MOLLE system or its modern laser-cut variant, enabling the attachment of additional gear;
 - Front and rear panels are equipped with pockets for inserting hard or soft ballistic armor;
- Inner lining made of synthetic mesh for enhanced ventilation;
- Load-bearing shoulder and waist strap system for comfortable wear;
- Each size offers a wide range of adjustment to ensure an optimal individual fit;
- Reinforced stitching for durability during intensive use.

WEST

ARP-01 Modular body armor vest

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: S, M, L, XL.

A modular body armor system made of 100% polyamide with a special protective coating. Designed to protect vital organs, it provides a high level of ballistic protection while maintaining comfort during prolonged wear. The construction allows for individual fit adjustment and the attachment of additional tactical equipment. Compatible with both hard armor plates and soft ballistic inserts.

FEATURES:

- Modular design consisting of 8 protective components;
 - Front and rear protection with pockets for hard armor plates and soft ballistic inserts;
- Height adjustment via adjustable shoulder straps;
- Chest circumference adjustment through a lace-adjustable cummerbund;
- Full MOLLE coverage on the front panel for attaching tactical gear;
- Loop (hook-and-loop) panel on the upper front for ID patches and insignia;
- Inner walls made of tactical mesh and padding for ventilation and shock absorption;
- Rear evacuation (drag) handle;
- Cummerbund with MOLLE system and pockets for soft ballistic inserts;
- Secure attachment of neck, shoulder, groin, and thigh protection modules;
- Ballistic collar protection height of at least 5 cm;
- Load-bearing waist belt with suspenders, chest strap, and shock-absorbing inserts;
- Full compatibility of all components with the MOLLE system.

ARP-04 Modular body armor vest

Reliable baseline protection combined with a modular design. The body armor consists of three components, is easy to adjust, and allows the configuration to be adapted to current mission requirements. The MOLLE system ensures fast and convenient attachment of additional equipment while maintaining comfort during extended wear.

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: S-M, L-XL.

FEATURES:

- Modular construction with 3 components: front, back, and side protection;
- Front and rear panels equipped with pockets for hard armor plates and soft ballistic inserts;
- Ballistic insert pockets secured with internal hook-and-loop fasteners;
- Front and back panels connected via height-adjustable shoulder straps;
- Full MOLLE coverage on the front panel for attaching additional tactical gear;
- Loop-type hook-and-loop panel on the upper front for ID patches and insignia;

- Inner lining made of tactical mesh and padding for ventilation and impact absorption;
- Rear evacuation (drag) handle;
- Cummerbund with Velcro fastening system for secure fit and chest circumference adjustment;
- Front panels of the side carriers equipped with MOLLE webbing.

WEST

ARP-03 Modular body armor vest

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: S, M, L, XL.

A modular external-wear body armor providing reliable baseline protection for vital organs. The three-component modular design — front, back, and side protection — allows easy adaptation to specific mission requirements while preserving comfort and freedom of movement.

FEATURES:

- Modular external-wear body armor with individual fit adjustment;
- Baseline protection of the front, back, and sides (cummerbund);
- Front and rear panels with pockets for hard armor plates and soft ballistic inserts;
- Hard armor plate pockets secured with water-resistant zippers;
- Internal pockets for soft ballistic inserts secured with hook-and-loop fasteners;
- Height adjustment via adjustable shoulder straps and shoulder pads;
- Front panel fully compatible with the MOLLE system for additional equipment;
- Three rows of loop-type hook-and-loop panels for ID patches and insignia;
- Additional accessory pocket on the front panel;
- Inner surface made of tactical mesh and foam padding for ventilation and shock absorption;
- Cummerbund with a reliable Velcro fastening system and chest circumference adjustment.

ARP-03sh Modular bulletproof vest with quick release system

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: S, M, L, X.

A modular external-wear body armor equipped with a quick-release system, designed for effective ballistic protection and rapid doffing in emergency situations. The design allows easy adjustment for height and girth and is compatible with both hard and soft ballistic armor components.

FEATURES:

- Modular external-wear body armor with individual adjustment capability;
- Baseline protection of the front, back, and sides (cummerbund);
- Front and rear panels with pockets for hard armor plates and soft ballistic inserts;
- Hard armor plate pockets secured with water-resistant zippers;
- Internal soft armor pockets secured with hook-and-loop fasteners;
- Internal soft armor pockets secured with hook-and-loop fasteners;
- Front panel fully compatible with the MOLLE system for attaching additional equipment;
- Three rows of loop-type hook-and-loop panels for ID patches and insignia;
- Additional accessory pocket on the front panel;
- Inner lining made of tactical mesh and foam padding for ventilation and shock absorption;
- Cummerbund with a secure Velcro fastening system and adjustable chest circumference.

ARPK-01 Modular body armor vest with quick reset system

Material: CORDURA 1000D, CORDURA 500D, 300D PU-coated polyester, mesh fabric, 5–8 mm polyethylene foam
Size: S, M, L, XL.

A modular body armor system featuring a configurable design that allows various protective components to be added or removed as required. It is equipped with a quick-release system, enabling rapid doffing of the vest in emergency situations. The set includes not only a classic plate carrier but also additional protection modules for the groin, sides, shoulders, neck, and thighs. The body armor is fully equipped with the MOLLE attachment system.

FEATURES:

- Modular construction allowing the vest to be used with or without ballistic protection elements, adapting to mission requirements;
- Quick-release system enabling emergency removal of the vest;
- Protected fasteners and locking elements prevent accidental opening during movement or under load;
- Configuration: the full set includes nine components providing comprehensive protection, as well as a load-bearing shoulder strap system;
- Attachment system: equipped with MOLLE webbing or its modern laser-cut version for mounting additional equipment;
- Adjustable sizing: the vest can be fitted to accommodate ballistic armor elements and the wearer's body size.

ABP-02p Plate Carrier (Body Armor Vest) with Quick-Release System

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: universal (S-XL).

A modern external-wear plate carrier designed for combat and duty use. Manufactured from 100% polyamide with a special protective coating, it provides reliable protection of vital organs, high comfort, and excellent durability. The five-component modular design allows the plate carrier to be configured to the user's individual needs and specific mission requirements.

FEATURES:

- Front and rear panels equipped with pockets for hard armor plates and soft ballistic inserts;
- Adjustable shoulder straps and shoulder pads with height adjustment for a precise fit;
- Shoulder strap design with Velcro attachments enabling fast and easy quick-release;
- Front panel fully compatible with the MOLLE system for attaching tactical pouches and equipment;
- Loop-type hook-and-loop panel on the upper front for ID patches and insignia;

- Inner lining made of tactical mesh and shock-absorbing foam for effective ventilation and cushioning;
- Rear evacuation (drag) handle for emergency use;
- Rigid skeleton cummerbund with 2M DUE EMME ROC 80 quick-release hardware and lace adjustment for chest circumference;
- Capability to mount side protection (cummerbund) with soft ballistic inserts;
- Groin protection cover that can also be used as a universal utility pouch.

ABP-02 Plate Carrier (Body Armor Vest) with Quick-Release System

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: universal (S-XL).

A modern plate carrier with a quick-release system, designed for combat operations. Lightweight, durable, and highly functional, it provides reliable protection and allows individual loadout configuration through the MOLLE system. The design supports the optional installation of side, shoulder, neck, and groin protection modules. A dependable choice for those who value speed, protection, and comfort.

FEATURES:

- Front and rear panels with pockets for hard armor plates and soft ballistic inserts;
- Adjustable shoulder straps and shoulder pads with height adjustment for an optimal fit;
- Shoulder strap construction with Velcro attachments enabling quick and easy release;
- Front panel fully compatible with the MOLLE system for mounting tactical pouches and equipment;
- Loop-type hook-and-loop panel on the upper front for ID patches and insignia;

- Inner lining made of tactical mesh and shock-absorbing foam for effective ventilation and impact reduction;
- Rear evacuation (drag) handle for emergency situations;
- Rigid skeleton cummerbund with 2M DUE EMME ROC 80 quick-release hardware and lace adjustment for chest circumference;
- Ability to attach side protection (cummerbund) with soft ballistic inserts;
- Groin protection cover usable as a universal utility pouch.

ABP-01 Plate carrier (front, back and skeleton covers)

An external-wear plate carrier made of 100% polyamide with a special protective coating, designed to protect vital organs. It features a simple and reliable three-component modular construction that provides a basic level of protection, a comfortable fit, and the ability to mount additional tactical equipment.

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: universal (S-XL).

FEATURES:

- Modular three-component design: front protection, back protection, and a soft skeleton cummerbund;
- Front and rear panels equipped with pockets for hard armor plates;
- Armor plate pockets secured with water-resistant zippers;
- Panels connected via adjustable shoulder straps and shoulder pads with height adjustment;
- Additional accessory pocket on the front panel of the plate carrier;
- Front panel fully covered with MOLLE webbing for attaching tactical gear;

- Three rows of loop-type hook-and-loop panels for ID patches and insignia;
- Inner lining made of tactical mesh and shock-absorbing foam for ventilation and cushioning;
- Soft skeleton cummerbund with Velcro fastening system for chest circumference adjustment;
- Comfortable and stable fit during extended wear.

VEST

ZHRB Unloading Vest with Pouches for Explosives Technician. Explosion-Proof Vest

Material: CORDURA 1000D, CORDURA 500D, CORDURA Hybrid, synthetic mesh.
Size: universal (S-XL).

A specialized load-bearing vest designed for explosive ordnance disposal units and related specialists, developed for operation in demanding environments. It ensures ergonomic and comfortable equipment carriage without restricting movement. The modular MOLLE system allows efficient organization of tools and accessories, providing fast access during operations. A reliable solution for professionals who value functionality, comfort, and well-organized gear.

FEATURES:

- Designed specifically for EOD technicians and related specialists;
- Provides comfortable equipment carriage without restricting mobility;
- Equipped with the MOLLE system for modular attachment of pouches and equipment;
- Allows individual configuration to meet specific operational tasks;
- Ensures quick and convenient access to tools and accessories;
- Durable, wear-resistant construction designed for intensive use;
- Secure attachment elements prevent accidental detachment of equipment during movement.

ZHRK Unloading Vest with Pouches for a Forensic Scientist

Material: CORDURA 1000D, CORDURA 500D,
CORDURA Hybrid, synthetic mesh.
Size: universal (S-XL).

A specialized load-bearing vest designed for forensic units, developed to meet the operational needs of crime scene investigations. It provides ergonomic and comfortable equipment carriage without restricting movement. The MOLLE system allows optimal placement of tools, instruments, and accessories, ensuring quick and convenient access during duty operations. A practical solution for professionals who value organization, mobility, and comfort.

FEATURES:

- Designed for forensic specialists and related professionals;
- Ensures comfortable equipment carriage without limiting mobility;
- Equipped with the MOLLE system for modular attachment of pouches and cases;
- Allows individual configuration tailored to specific tasks;
- Provides quick access to tools and equipment during operations;
- Durable and wear-resistant construction designed for long-term use;
- Secure attachment elements prevent accidental detachment of equipment during active movement.

VEST

ZHR-10 Unloading Vest

Material: CORDURA 500D.
Size: universal.

A universal load-bearing vest for military use, designed for efficient and comfortable carriage of combat equipment. Made from high-strength Cordura fabric in Coyote color, it offers excellent durability and reliability in field conditions. The well-engineered design ensures even weight distribution, freedom of movement, and rapid access to essential gear.

FEATURES:

- Universal size adaptable to various user configurations;
- Constructed from high-strength, abrasion-resistant Cordura material;
- Four front pouches designed to carry up to eight AK magazines;
- Concealed compartment for documents and small accessories;
- Side cargo pouches equipped with secure zipper closures;
- Wide, comfortable shoulder straps with radio attachment points;
- Equipped with a quick-release system: two large side-release buckles on the shoulder straps and two smaller buckles on each side;
- Rear evacuation (drag) handle;
- Back panel and side pouches equipped with the MOLLE system for attaching additional modular equipment;
- MOLLE cutouts enhance airflow and improve ventilation during wear.

RPS Belt and Shoulder Unloading System with Pouches

Material: CORDURA 1000D.

Size: universal.

A functional belt-and-suspenders load-bearing system designed for even weight distribution and convenient gear placement. It consists of a rigid duty belt and ergonomic shoulder straps, ensuring stable retention and comfort during prolonged use. The laser-cut MOLLE system on the front surface of the belt allows modular configuration of equipment according to mission requirements.

FEATURES:

- Consists of a rigid belt and ergonomic shoulder straps;
- Belt equipped with laser-cut MOLLE attachment points on the front surface;
- Enables modular attachment of pouches and equipment;
- Inner surfaces of the belt and straps made of synthetic mesh to enhance airflow;
- Foam padding with ventilation channels improves microclimate and comfort;
- Ensures even load distribution and comfort during extended wear;
- Durable, wear-resistant construction suitable for intensive use.

**TACTICAL
MEDICAL
SUPPORT**

All pouches are attached to the walls of the backpack using textile hook-and-loop fasteners

Mounting system for equipment (MOLLE System)

Lower pocket for rain cover

Ampoule holder

High-quality fastener. It is not afraid of shocks, solar ultraviolet radiation, frost.

RUM

ACROPOLIS

RUM Medical backpack with pouches and ampoule holder

A medical backpack designed for transporting and storing medical supplies used for first aid and emergency medical care. Spacious and practical, it is well suited for field conditions and combat environments.

Materials: CORDURA 1500D; CORDURA Hybrid; Polyester 300 D PU; PVC film.
Volume: 60 l.

FEATURES:

- Modular attachment panels (MOLLE system) on the front and side panels;
- Two additional external compartments on the front panel;
- One additional compartment on each side panel;
- Evacuation handle and two side carry handles;
- Full interior loop-type hook-and-loop lining for securing pouches;
- Reinforced back panel with cross-linked polyethylene foam and plastic insert;
- Waist belt made of webbing with side-release buckle;
- Ergonomically shaped shoulder straps;
- Adjustable sternum strap system;
- Visual identification of internal pouches.

RMM-1 Modular Medical Backpack (raid + assault)

A reliable modular medical backpack designed for operation in any environment, capable of withstanding extreme loads and adverse weather conditions. The system consists of a main backpack (45 L) and an additional detachable medical pouch backpack (10 L). PMM-1 provides rapid access to equipment via side zippers and a fully opening front panel.

FEATURES:

- Large central compartment with side access;
- Modular attachment panels (MOLLE system) on the front and side panels;
- Daisy chain webbing for additional external attachments;
- Evacuation handle and two side carry handles;
- Side compression straps on the main compartment;
- Full interior loop-type hook-and-loop lining for pouch attachment;
- Reinforced back panel with cross-linked polyethylene foam, plastic insert, and internal frame;
- Compatible with hydration system hose routing on both left and right sides;
- Adjustable shoulder straps with shock-absorbing padding;
- Quick-release system.

Materials: CORDURA 1500D (Invista Certified Nylon), CORDURA 1Hybrid.

Size: Main backpack: 43x30x11cm. **Volume:** 45 l.
Backpack-pouch: 40x24x10cm.

RMT-1 Medical Backpack with Pouches and Ampoule Holders

Materials: CORDURA 1500D; CORDURA Hybrid; Polyester 300D PU; PVC film; Mesh.
Size: 43 x30 x11 cm. **Volume:** 45l.

A reliable and user-friendly backpack designed for rapid access to medical equipment. It features a single main compartment that can be opened with one hand and fully unfolded for efficient work in field conditions. Side pockets and a modular pouch system ensure organization and fast identification of essential items.

FEATURES:

- Quick access in any position, with one-handed rapid opening;
- Modular attachment panels (MOLLE system) on the front and side panels;
- Detachable ergonomic shoulder straps;
- Detachable waist belt made of webbing;
- Dedicated side pockets for medical gloves;
- Modular pouches with transparent PVC panels for easy content identification;
- Elastic retention bands for securing instruments and equipment;
- Panel for attaching additional pouches;
- Internal cargo pockets.

RMT-2 Medical Backpack with Pouches and Ampoule Holder

A practical backpack for medical equipment, designed for fast deployment in the field. It features a single main compartment that opens with one hand and fully unfolds, allowing effective operation even in high-stress situations. The well-organized internal layout supports rapid medical response.

Materials: CORDURA 1500D; CORDURA Hybrid; Polyester 300D PU; PVC film; Mesh.
Size: 43 x25,5 x11 cm.

FEATURES:

- Quick access in any position, with one-handed rapid opening;
- Modular attachment panel (MOLLE system) on the front panel;
- Detachable ergonomic shoulder straps;
- Detachable webbing waist belt;
- Dedicated side pockets for medical gloves and a mount for medical scissors;
- Modular pouches with transparent PVC panels for easy content identification;
- Elastic retention bands for securing instruments and equipment;
- Panel for attaching additional pouches.

SUM-1 First Aid Kit/ Medical Bag

Materials: CORDURA 1500D; Polyester 300 D PU, brass buttons.

Size: 20x14x9 cm.

A compact and reliable first aid pouch made from durable materials—an optimal choice for military personnel and outdoor enthusiasts. Fast access to the contents, convenient internal retention for medical supplies, and universal attachment via the MOLLE system ensure readiness at any moment.

FEATURES:

- Designed for storage and transport of an individual first aid kit;
- Zipper closure with dual sliders for rapid access;
- Internal retainers for ampoules, bandages, tourniquets, and other medical supplies;
- MOLLE attachment for convenient mounting on gear;
- Suitable for both military and outdoor use.

SUM-3 First-aid kit

Material: 1000D polyester. Polyester 300 D PU.

Size: bag - 16.5 x 7.3 x 11.9 cm, insert - 34.4 x 32.7 cm.

A functional medical bag with a fold-out organizer insert, allowing the entire first aid kit to be arranged in a convenient and rapidly accessible format.

FEATURES:

- Consists of an outer bag and a removable organizer insert;
- Designed for storage and organization of medical supplies;
- Organizer unfolds for quick access to all contents;
- Retainers for ampoules, syringes, tourniquets, and other items;
- Suitable for military use as well as civilian medical services;
- MOLLE attachment for convenient mounting on equipment.

SUM-2 First Aid Kit/ Medical Storage Bag with a Tabh

Material: 1000D polyester.

Size: bag - 16.5 x 7.3 x 11.9 cm., insert - 34.4 x 32.7 cm.

A vertical medical pouch with an organizer insert, designed to provide fast access to contents even in the most demanding conditions. Secure retainers, MOLLE attachment, and a well-thought-out design make it indispensable in combat and field environments.

FEATURES:

- Vertical configuration for rapid access;
- Designed for an individual medical kit.
- Organizer insert for efficient placement of medical tools, tourniquets, bandages, scissors, and more;
- MOLLE attachment compatible with tactical vests and backpacks;
- One-handed opening, suitable for emergency situations.

NB-1 First aid kit/ medical storage bag

Material: 1000D polyester, polyamide tape, reinforced threads, brass buttons.

A practical first aid pouch with full clamshell opening for fast access to medical supplies. Securely mounts to MOLLE or a belt and features an additional thigh strap for stability, ensuring readiness in any situation.

FEATURES:

- Designed for transport of an individual medical kit;
- Fully opening design for convenient organization of contents;
- Internal retainers for bandages, syringes, ampoules, and more;
- Rigid mounting via MOLLE or belt attachment with additional thigh strap;
- Suitable for military, outdoor, and civilian use.

TACTICAL MED

SHTA-1 Quick-release Tactical First Aid Kit

A quick-detach tactical IFAK pouch designed for rapid access to medical supplies in field and combat environments. The design allows one-handed removal of the pouch from its mounting platform—critical when providing first aid. Compatible with MOLLE gear and constructed from durable, wear-resistant materials for intensive use.

Material: CORDURA Lazer Cut, CORDURA 1000D, polyester D300, mesh 260 g/m²
Size: 21 x 17 x 10 cm.

FEATURES:

- Quick-detach mounting system enabling instant removal from the platform.
- MOLLE compatibility for secure attachment to body armor, load-bearing gear, or backpacks.
- Dual-zipper opening allowing access from either side.
- Velcro panel for pouch identification.
- Compact form factor that does not restrict movement or increase gear profile.
- Reinforced stitching and hardware designed for intensive field use.

SM Medical Bag

Material: Polyester 1000D PU.

Size: 27 x 45 x 18 cm.

A reliable medical bag designed for transporting medications and medical instruments in field and duty environments. Durable, spacious, and easy to use, it ensures organized storage and quick access to essential supplies during medical care.

FEATURES:

- Spacious main compartment with internal dividers and additional pouches;
- Adjustable internal dividers and pouches secured with hook-and-loop fasteners;
- Made from durable material with a water-repellent coating;
- Modular internal organization;
- Carry handle;
- Shoulder strap for convenience;
- Side attachment system for additional equipment;
- Velcro panel for identification.

NMT-1 Soft Tactical Medical Stretcher

Lightweight, frameless tactical stretchers designed for emergency and tactical medical use. They provide fast and safe casualty evacuation in field conditions. Durable materials and a well-engineered design combine reliability, ease of use, and simple maintenance.

Material: D1000 polyester, polyamide sling.
Size: 188x68 cm when unfolded.

FEATURES:

- Frameless design ensures low weight and compact size;
- Rated load capacity up to 150 kg;
- Made from Oxford D1000 material with PVC coating on one side;
- Sewn with high-strength PE thread Tytan No. 40;
- Easy to clean and disinfect;
- Compatible with standard cleaning and disinfection agents;
- Suitable for use across a wide temperature range;
- Equipped with 6 carry handles (3 on each side);
- Full-length webbing straps for casualty securing;
- Adjustable straps with side-release buckles allow rapid release if required.

NMT-2 Rigid Evacuation Medical Stretcher

Material: 2.5mm plastic, textile webbing, eyelets, plastic fasteners.

Size: 65x23 cm folded, 220x65 cm unfolded.

Modern rigid-structure medical stretchers designed for casualty evacuation. The foldable design ensures easy transport, while durable straps provide secure fixation and safe movement of personnel.

FEATURES:

- Rigid construction;
- Compact roll-up design for transport;
- Durable material resistant to tearing and moisture;
- Ergonomic carry handles for multi-person transport;
- Patient securing capability using straps;
- Designed for repeated use;
- Suitable for field operations and combat environments.

STP-2 Evacuation Strap

Material: 100% polyamide (high-strength, high-strength webbing).

Size: 350 cm.

A universal evacuation strap designed for rapid assistance in critical situations. Lightweight, compact, and durable, it is suitable for military tasks as well as rescue operations.

FEATURES:

- Made from high-strength synthetic webbing;
- Compact and lightweight for easy transport;
- Suitable for both military and rescue applications;
- Withstands heavy loads without loss of performance;
- Wide range of uses: evacuation, towing, auxiliary equipment;
- Does not absorb moisture and dries quickly.

RA-2

ACROPOLIS

RBI-4 Individual Combat Backpack (40 liters)

A reliable partner for any environment—from field operations to extreme missions. A spacious main compartment, two large external pockets, and a MOLLE attachment system allow efficient and flexible gear organization. A rigid anatomical back panel and adjustable shoulder straps ensure comfort during prolonged wear. The water-repellent fabric protects the contents from rain and dust, while the bottom-mounted sleeping mat straps add versatility.

Material: CORDURA 1050D, CORDURA Hybrid
Size: 32x50x26 cm. **Volume:** 40 l.

FEATURES:

- Designed for civilian and extreme-use environments;
- Large main compartment with two external pockets;
- MOLLE attachment points and Velcro panels;
- External pockets for essential gear storage;
- Emergency drag handle;
- Hydration system routing compatibility;
- Anatomically shaped shoulder straps with length adjustment;
- Adjustable sternum strap;
- Rigid anatomical back panel with soft ergonomic padding;
- Bottom attachment straps for a sleeping mat or additional gear;
- Water-repellent material resistant to mechanical damage and UV exposure.

BACKPACK

RBI-5 Individual Combat Backpack (35 liters)

A high-capacity backpack ideal for civilians, military personnel, and active travelers. Features a central compartment and a MOLLE system for attaching additional pouches. A rigid back panel and anatomically shaped shoulder straps ensure comfort in all conditions. Made from durable fabric resistant to rain, frost, and constant heavy use.

Material: CORDURA 1000D, CORDURA Hybrid, polyamide tape, reinforced thread, acetal fittings
Size: 31x50x14,5 cm. **Volume:** 35 l.

FEATURES:

- Main compartment with two internal pockets for small items;
- Front panel and sides equipped with MOLLE webbing;
- Rigid ergonomic back panel;
- Padded, ergonomically shaped shoulder straps for long-term wear and heavy loads;
- Durable material suitable for various weather condition.

PP-90 Raid Backpack

RR-90 is a true workhorse built for long-range operations. High capacity, load comfort, and maximum modularity allow it to be adapted to virtually any mission. A dependable companion in demanding field conditions.

Material: CORDURA 1500D (Invista Certified Nylon), CORDURA 1Hybrid, D300 polyester, synthetic mesh, 2-3mm plastic.
Size: 71x38x33 cm. **Volume:** 80l.

FEATURES:

- Suitable for military, security forces, and civilian use;
- All panels padded with chemically cross-linked polyethylene foam;
- Hydration hose routing to either the left or right side;
- Front and side MOLLE platforms for additional pouches;
- Rigid framed ergonomic back panel with anatomical curvature;
- Ergonomically padded shoulder straps for comfort under heavy loads;
- Height-adjustable anatomical shoulder straps;
- Adjustable sternum strap with Fastex buckle;
- Durable fabric resistant to harsh weather conditions;
- Large expandable capacity;
- Rigid load-bearing waist belt;
- Full clamshell opening;
- Internal mesh organizer pockets;
- Access to the main compartment from multiple sides.

BACKPACK

RP-90 Tactical Backpack (90 L)

Material: CORDURA 1000D, Polyester 300D PU; Mesh; 3D mesh.
Volume: 90L.

A high-capacity 90-liter tactical backpack designed for extended missions, combat tasks, and transporting large volumes of equipment. The internal frame ensures proper weight distribution, stability, and comfort even when fully loaded.

FEATURES:

- Spacious main compartment with full clamshell-style opening;
- Two large front pockets for organized storage;
- Advanced MOLLE system on the front and sides for modular expansion;
- Compression straps for load stabilization and volume reduction;
- Heavy-duty zippers with extended pull tabs;
- Internal rigid frame for shape retention and reduced back strain;
- Ergonomic back panel with ventilation inserts;
- Padded anatomical shoulder straps with height adjustment;
- Adjustable waist belt for effective load transfer to the hips;
- Sternum strap for additional stability;

RP-45 Tactical Backpack (Compact)

Material: CORDURA 1000D, Polyester 300D PU; Mesh; 3D mesh.
Volume: 45l.

A versatile 45-liter tactical backpack that can be used as a standalone assault pack or as an auxiliary module for the RP-90 backpack. The shoulder straps can be concealed in a dedicated pocket, allowing secure attachment to the MOLLE system of a larger pack.

FEATURES:

- Main compartment with full opening for easy access;
- Internal pockets and organizers;
- Quick-access front pocket;
- External MOLLE system for additional pouches;
- Dedicated pocket for stowing shoulder straps;
- Converts into a flat modular panel when folded;
- Compatible with MOLLE attachment systems;
- Suitable as an assault day pack or auxiliary backpack;
- Soft anatomical shoulder straps with adjustment;
- Ergonomic ventilated back panel;
- Sternum strap for stabilization;
- Compression straps for load securing;
- Heavy-duty compression hardware;

BACKPACK

RP-60 Tactical Backpack (60 L)

A 60-liter tactical backpack designed for extended missions, field operations, and intensive use in demanding conditions. A versatile solution for users who value reliability, comfort, and adaptability. The ergonomic ventilated back panel enhances airflow and comfort during prolonged wear. The structure remains stable and maintains its shape during movement. The set includes two types of detachable pouches, significantly expanding functionality and allowing mission-specific load configuration.

Material: CORDURA 1000D, CORDURA Hybrid;
Polyester 300D PU; Mesh; 3D mesh.
Volume: 60l.

FEATURES:

- Stable construction that maintains shape under load;
- Internally divided into upper and lower compartments, convertible into a single compartment if required;
- Lower compartment includes a dedicated footwear pocket;
- Removable padded shoulder straps with height adjustment;
- Removable padded waist belt with rigid outer structure for long-term comfort;

- Ergonomic ventilated back panel;
- Full-surface MOLLE modular system;
- Two zippered pouches and two smaller drawstring pouches mounted via MOLLE;
- Reliable hardware and heavy-duty webbing;
- Quick-release hardware integrated into the shoulder straps;

RA-2 Administrative Backpack

An administrative backpack designed for military personnel during duty and everyday use. Provides secure and organized transport for A4 documents, a laptop up to 15.6", office supplies, and essential accessories. Its compact size and thoughtful design make it practical for both service and field environments.

Material: CORDURA 1000D, CORDURA Hybrid

Volume: 17l

Lining: 300D polyester

FEATURES:

- Designed for carrying A4 documents, laptops up to 15.6", and accessories;
- Front pocket with Velcro panel for identification patches;
- Reinforced back panel and walls with chemically cross-linked polyethylene foam for enhanced protection;
- Additional plastic reinforcement plate integrated into the back panel;

- Equipped with a carry handle and ergonomic shoulder straps;
- Compact form factor for comfortable daily transport;
- External LaserCut MOLLE system for attaching additional equipment;

BACKPACK

RL-1 Backpack for Carrying Special Tools

Material: 100% polyamide from textured yarn of increased strength
Size: height – 85 cm, width – 61 cm, depth – 30 cm

A specialized backpack designed for prolonged carry of heavy-duty tools during operational tasks. The construction ensures secure tool fixation, balanced load distribution, and user comfort when transporting bulky and heavy equipment.

FEATURES:

- Designed to carry simultaneously:
 - modular breaching ram with two mounted heads;
 - specialized pry bar;
 - heavy-duty crowbar;
 - universal bolt cutter;
 - Integrated metal reinforcement plate for increased rigidity and back protection;
 - Dedicated retention systems for secure tool fixation;
- Two reinforced padded shoulder straps for long-term comfort;
- Carry handle for convenient transport;
- Adjustable sternum strap with Fastex buckle and regulator;
- Free ends of webbing heat-sealed to prevent fraying;
- Main compartment secured with a zipper;

SPB-2g

ACROPOLIS

SPB-2g Dual Grenade Pouch

Material: CORDURA 1000D.

Size: 11 x 11 x 5 cm.

A rugged pouch designed to securely carry two grenades while providing fast and reliable access during operations.

FEATURES:

- MOLLE-compatible mounting system;
- Individual retention flaps for each grenade;
- Reinforced side walls for added protection;
- Drainage eyelets for moisture release.

SPRU Pauches for the used weapon drop-off

Material: CORDURA 1500D, 300D polyester with PU coating

Size: 25 x 24 x 12 cm

A fast and secure solution for discarding empty magazines during combat, minimizing reload time and maintaining operational tempo.

FEATURES:

- Soft, collapsible construction for easy magazine dumping;
- MOLLE-compatible attachment;
- Additional belt-mount option;
- Drainage openings for water and debris.

PKA-1 Handcuff Pouch

Material: CORDURA 1000D

Size: 13 x 12,5 x 1,5 cm.

A durable and compact handcuff pouch made from Cordura® 1000D, providing secure storage and quick access when needed. MOLLE and belt compatibility make it suitable for tactical use.

FEATURES:

- Compact pouch for storing and carrying handcuffs;
- Secured with a Velcro flap and snap button;
- Attaches to a duty belt or MOLLE platform;
- Drainage hole for moisture evacuation.

PCN-1 Baton Pouch

Material: CORDURA 1000D

Size: 13,5 x 7 x 4 cm

A reliable pouch for a rubber baton made from durable Cordura® 1000D. Allows fast attachment to a belt or MOLLE system and ensures secure retention and quick access in any environment.

FEATURES:

- Compatible with belt and MOLLE mounting;
- Upper retention strap with snap button;
- Protects the baton and allows rapid deployment.

SPBA-30n AK Double Magazine Pouch

Size: 23,3 x 10,5 x 5 cm

Material: 1000D polyester, polyamide webbing, reinforced thread, brass snaps.

A tactical magazine pouch with a secure Fastex buckle closure and drainage hole, suitable for all-weather use. An excellent choice for military service and shooting training.

FEATURES::

- Designed to carry one or two magazines or similarly sized equipment;
- Flap closure with Fastex plastic buckle;
- Reinforced side panels;
- Drainage hole for water runoff;
- Attaches to a belt or MOLLE system.

PHB-1 Gas Spray Pouch (Belt-Mounted)

Material: 1000D polyester, polyamide webbing.

Size: 23,3 x 10,5 x 5 cm.

A durable pouch for tactical gas spray with universal attachment to a belt or MOLLE system. Provides quick access and reliable protection against mechanical damage.

FEATURES:

- Protective pouch with belt or MOLLE attachment;
- Fits most standard tactical gas spray canisters;
- Ensures fast access and secure retention.

PL-1 Flashlight Pouch (Belt-Mounted)

Material: CORDURA 1000D

Size: 14,5x5 x3 cm

A compact and protective flashlight pouch made from Cordura® 1000D—an essential companion for night operations. Easily mounts to a belt or MOLLE system and allows rapid access.

FEATURES:

- Protects the flashlight from damage and dirt;
- Belt or MOLLE-compatible mounting;
- Compact and lightweight design.

KNP-1 Belt Holster for Pistol (MOLLE-Compatible)

Material: CORDURA 1000D, 3 mm polymer insert, plastic hardware.

Size: 16x11x3 cm.

A tactical pistol holster made from Cordura 1000D with a rigid form-retaining frame, providing secure weapon retention and rapid access. Compatible with MOLLE systems and duty belts, with adjustable orientation for right- or left-handed users

FEATURES:

- Universal belt holster for most pistol models;
- Adjustable for right- or left-hand draw;
- MOLLE or belt mounting options;
- Quick access via ergonomic retention flap.

SPB-M Open-Top Magazine Holster

Material: CORDURA 1000D, polyamide, polymer inserts.

A functional quick-access pouch designed for magazine carry in dynamic environments. The reinforced construction enables fast and efficient reloading.

FEATURES:

- Rigid polymer side walls for secure magazine retention;
- High-quality elastic retention band for stability during movement;
- Can be used as a holster for pistols such as PM, Fort, and similar models;
- MOLLE webbing on the front panel;
- Rear wall higher than the front, allowing near-blind reinsertion of the magazine;

SKG-1

ACROPOLIS

SKG-1 Administrative Bag

Material: 1000D PU Polyester, CORDURA Hybrid, 300D PU Polyester

Size: SKG-1: 35 × 30 × 7 cm, SKG-3: 40 × 29 × 10 cm.

The SKG-1 / SKG-3 administrative bag is a reliable companion for daily duties and field deployments. Durable Cordura, well-thought-out compartment organization, and a modern tactical design make it suitable for both military and civilian use.

FEATURES:

- Compact yet spacious — ideal for documents, stationery, and small essentials;
- Front panel with MOLLE system for attaching additional pouches;
- Internal organizer for pens, notebooks, and small accessories;
- Laptop compartment for devices from 11" to 14" and ultrabooks up to 15";
- Dedicated laptop securing system;
- Soft and comfortable carry handle;
- Impact-resistant hardware;
- Side pocket for a water bottle;
- Adjustable shoulder strap;
- Modern, tactical design.

TBP-1m Tactical Waist Bag (Fanny Pack)

Material: CORDURA 1000D, CORDURA Lazer Cut, D300 polyester, 5 mm PPE, polyamide webbing, impact-resistant plastic hardware.

Size: 25x14x11 cm.

A compact and multifunctional waist bag that keeps essentials within easy reach. Ideal for urban use, training, and field operations.

FEATURES:

- Suitable for military, security services, and civilian use;
- Multiple compartments for efficient organization;
- Can be worn on the waist or over the shoulder;
- Can be used as a standalone pouch;
- Impact-resistant plastic hardware for MOLLE attachment;
- Rotating Fastex buckles for comfort during movement;
- Lightweight and compact design.

SPP-2 Concealed Carry Shoulder Bag (Holster)

Material: CORDURA 1500D; 300D PU Polyester.

Size: 23x17,5x2,5 cm.

A discreet and comfortable solution for concealed pistol carry. An excellent choice for operational tasks and civilian concealed carry.

FEATURES:

- Designed for concealed carry of compact firearms;
- Additional compartments for personal items, magazines, and accessories;
- Adjustable shoulder strap;
- Low-profile, discreet exterior appearance.

BAGS

SG-2 Pouch for body hygiene kit

Material: Polyester 1000D.

Size: 26x16,5x10,5 cm.

A practical and well-organized bag for personal hygiene items. An ideal companion for business trips, hiking, and field conditions.

FEATURES:

- Compact form factor with multiple compartments;
- Internal organizers for hygiene products;
- MOLLE attachment capability;
- Reinforced drainage opening for moisture removal;
- Hanging option using a brass hook.

SG-2n Pouch for body hygiene kit

Material: Polyester 1000D.

Size: 23x21x10 cm.

A lightweight and compact hygiene bag designed for essential personal items in field and outdoor environments.

FEATURES:

- Compact size for a minimal hygiene kit;
- Convenient pocket layout;
- Plastic hook for hanging.

CHSO-1 Garment Bag

Designed for convenient storage and transport of outerwear, military uniforms, headgear, and footwear during deployments, training, or extended travel. Features a rigid outer structure and a soft inner garment cover. Made from durable, water-resistant polyester for long-term use and heavy loads.

FEATURES:

- Protects clothing during transport;
- Built-in hanger attachment;
- Hanging hook;
- Additional garment securing straps;
- Separate pockets for headgear and accessories;
- Large external pocket;
- Compact folding design;
- Soft carry handle and shoulder strap;
- ID pocket.

Material: 1680D Polyester; 300D PU Polyester

Size: Unfolded: 67 × 120 × 12 cm

Folded: 67 × 56 × 12 cm.

ORPN-1 Organizer for Service Member

A practical and functional organizer for storing and transporting personal equipment. Suitable for medical supplies, hygiene items, or small gear.

Material: D300 Polyester, Polyethylene.

Size: Unfolded: 54 × 91 cm

Folded: 27 × 24 cm.

FEATURES:

- Multi-section organizer with transparent pockets;
- Full opening for fast access to contents;
- Can be hung when unfolded;
- Folds compactly for transport.

STI Individual transport bag, load-bearing bag

A military-grade duffel backpack designed for transporting large volumes of personal gear and equipment. Made from heavy-duty, wear-resistant fabric for long-term durability in field conditions.

Material: CORDURA 1000D; 300D PU Polyester;

FEATURES:

- 2-in-1 functionality;
- Can be carried as a standard duffel using side handles;
- Can be worn as a backpack using wide shoulder straps;
- Soft, adjustable shoulder straps with Fastex buckles for quick release;
- Reinforced with heavy-duty webbing stitched around the entire body;
- End handles for easy extraction from vehicles or cargo compartments;
- Zippered side pocket for quick access to documents or small items

ACROPOLIS

FZ-20, FZ-20a

FZ-20, FZ-20a Universal Weapon Case/ Tactical Gun Carry Bag.

Size(internal): 102x26 cm/112x26 cm

Materials: CORDURA, polyethylene foam, polyester (300D)

Universal weapon cases providing reliable firearm protection and convenient transport. Thoughtful internal organization ensures secure storage of all essential equipment.

FEATURES:

- Suitable for both civilian hunters and military personnel;
- Compatible with various types of long firearms;
- Soft padded lining for protection against impacts and scratches;
- Additional pockets for magazines and accessories;
- Durable carry handles and shoulder strap;
- Concealed backpack-style shoulder straps (stowed in a dedicated pocket);
- Includes additional modular pouches.

INCLUDED COMPONENTS:

- Rifle ammunition bandolier pouch;
- Shotgun shell bandolier pouch;
- Small accessories pouch;
- Documents and valuables pouch.

CHMS-1 Case-Mat for Sniper Rifle

Material: 1000D PU-coated polyester; CORDURA Hybrid; 300D PU polyester
Size: 135x32x7 cm - folded, 205x100 cm unfolded.

CMS-1 — a versatile protective solution and shooting platform for snipers. Easily converts from a transport case into a comfortable shooting mat.

FEATURES:

- Converts from rifle case into shooting mat;
- Protects the weapon from dirt and mechanical damage;
- Integrated pockets for magazines and accessories;
- Reinforced carry handles for easy transport.

CHNP Gas Mask Bag

Material: polyester D300.
Size: 33x23x10 cm.

Compact and durable pouch designed to protect and carry a gas mask. Ensures readiness of personal protective equipment in all conditions.

ОСОБЛИВОСТІ:

- Protects the gas mask from dust, moisture, and mechanical damage;
- Can be attached to a belt or MOLLE-compatible gear;
- Quick and easy access to contents.

ChGS-2 Bag-backpack for drinking water hydraulic system

Material: CORDURA 1000D, 300D polyester, 5 mm foam padding, polyamide webbing
Size: 44x23,5x1,7 cm.

A practical solution for carrying a hydration bladder during long missions and training. Compatible with most hydration systems; can be mounted on gear or carried separately.

FEATURES:

- Capacity for hydration bladders up to 3 liters;
- MOLLE attachment system;
- Easy access to the reservoir;
- Padded back panel for carrying comfort.

ChGS-1 Bag for drinking water hydraulic system

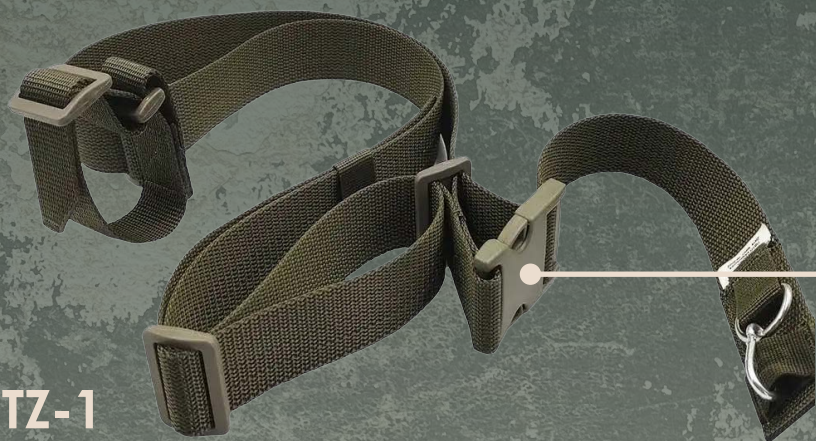

Material: CORDURA 1000D, CORDURA Lazer Cut, 5 mm foam, polyamide tapes.
Size: 34x18x3 cm.

A compact hydration carrier designed for maximum mobility and rapid access to drinking water in field conditions.

FEATURES:

- Designed for 1.5–2 liter hydration bladders;
- Lightweight and compact;
- MOLLE-compatible mounting.

TRT Tactical Equipment Belt

Material: CORDURA 1500D, CORDURA Hybrid, 2 mm polymer insert, 300D PU polyester.

Size: XS-S (80-90 cm), S-M (88-98 cm), M-L (96-106 cm), L-XL (101-121 cm), XL-XXL (117-127 cm)

A durable and versatile tactical belt designed for securing equipment and distributing load efficiently. Built for intensive field use.

FEATURES:

- Modern design suitable for both civilian and extreme operational use;
- Rigid construction for load stability;
- Full-length laser-cut MOLLE system for pouch attachment;
- Heavy-duty quick-release buckle;
- Adjustable fit for individual body parameters.

RDZ-1 One-Two Point Tactical Sling for Weapons

Material: polyamide tape, impact-resistant plastic fastener and reducer, metal carabiners and rings.

Size: Length: 98-146 cm., Webbing width: 40 mm.

A versatile weapon sling offering configurable attachment options to enhance shooter mobility and comfort.

FEATURES:

- 40 mm polyamide webbing;
- Quick conversion between 1-point and 2-point configurations;
- Adjustable length strap.

RTZ-1 Three-Point Tactical Sling for Weapons

Material: polyamide

Size: width 40 mm.

A three-point weapon sling providing maximum weapon control and stability in dynamic environments.

FEATURES:

- Heavy-duty 40 mm webbing;
- Additional attachment points for enhanced stability;
- Rapid length adjustment.

RB-1/ RT-1 Belt (40 / 45 mm Width)

Material: Polyamide webbing, polymer buckle.

Size: S (95 cm), M (110 cm), L (125 cm), XL (140 cm).

A reliable trouser and tactical belt suitable for everyday wear and field use.

FEATURES:

- Durable webbing construction;
- Classic locking buckle;
- Adjustable length.

SPS-1 Tactical Unloading Belt with Pouches

Material: CORDURA 1000D, CORDURA Hybrid.

Size: universal

A functional component of a security officer's individual equipment, designed for carrying and organizing essential gear. The system consists of a rigid duty belt with a set of modular pouches, ensuring efficient organization and quick access during operational duties.

FEATURES:

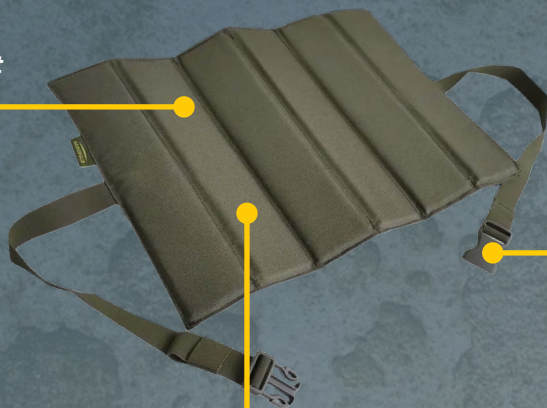

- Rigid belt construction for stability and even load distribution;
- Secured with a three-point fast-release polymer buckle;
- Hook-and-loop lining along the inner belt surface for additional fixation;
- Equipped with two polymer belt keepers to secure belt ends;
- Prevents pouch shifting during movement.

INCLUDED COMPONENTS:

- Safety belt;
- Holster;
- Cartridge pouch;
- Baton pouch;
- Handcuff pouch;
- Gun shop pouch;
- Gas cartridge pouch;
- Flashlight pouch.

FKS-1

FKS-1 Tactical Medical Stretcher/Field Mat

Material: 1000D polyester, 8-10 mm polyethylene foam.
Size: 60x20x12 cm folded, 180x60x0.8 cm unfolded.

The FKS-1 Mat–Stretcher is a practical, multifunctional folding military sleeping mat designed for field use. Made from high-quality thermal insulation material — 8–10 mm polyethylene foam, it effectively protects the body from cold, moisture, and uneven terrain. Suitable for military personnel (infantry, reconnaissance units, snipers) as well as for civilian use such as hiking, fishing, and hunting. When folded, it can also be used as a seat pad.

FEATURES:

- 2-in-1 function: sleeping mat + medical / evacuation stretcher;
- 8–10 mm polyethylene foam thermal insulation;
- Outer fabric made of durable 1000D water-repellent polyester;
- Reinforced with high-strength polyamide webbing;
- 10 carry handles for safe and convenient casualty evacuation;
- 2 securing straps with side-release buckles to fix the casualty;
- Divided into 9 sections for even load distribution;
- Compact folding without damaging the foam structure;
- Removable inserts for easy maintenance;
- Resistant to moisture, mechanical damage, and high temperatures;
- Can be used as a seat mat when folded.

FKS-2 Field Karemat/ Folding Tactical Mat

A practical and functional folding sleeping mat made of 8 mm polyethylene foam. Lightweight and soft, it effectively protects against heat loss during prolonged contact with cold ground, damp surfaces, or concrete. Elastic straps along the edges securely hold the mat in a folded position, allowing it to be used as a seat pad during halts or extended stays.

FEATURES:

- Effective protection from cold, moisture, and uneven surfaces;
- 8 mm polyethylene foam insulation;
- Outer material: 300D water-resistant polyester;
- Divided into 9 sections with individual inserts;
- Folds compactly without damaging the foam;
- Elastic straps for secure fixation when folded;
- Can be used as a seat mat;
- Camouflage color — olive (khaki);
- Suitable for military and civilian use.

Materials: 300D polyester, 8 mm polyethylene foam.
Size: 60x20x12 cm - folded, 180x60x0,8 cm - unfolded.

ACCESSORY

SP-1† Folding Seat/ Field Mat/ Portable Tourist Caremat

Material: Oxford D600 polyester, polyethylene foam 8mm, elastic strap 25mm.

Size: folded seat – 30 x 6,5 x 5,5 cm; unfolded seat – 30 x 39 x 0,8 cm;

An essential outdoor accessory for all seasons. The resilient, soft, and lightweight design provides comfort on uneven terrain during hikes and field activities.

FEATURES:

- Folds into a compact size;
- Thermal and moisture insulation properties;
- Adjustable body attachment system.

SPK-1 Military Sleeping System

Material: Bologna; Rip-Stop.

Size: chest width 90cm, leg width 68cm, length 195cm

A versatile sleeping system designed for comfortable rest in field conditions. Provides reliable protection from cold and moisture.

FEATURES:

- Lightweight, warm, and compact when packed;
- Suitable for use in various climate conditions;
- Dual-sided zipper for ease of use;
- Storage and transport carry bag included.

ACROPOLIS

SE-2p Priest's Bag for Eucharistic Set

Material: 600D polyester, polyethylene foam.

Size: 41 × 30 × 13 cm.

A specialized bag designed for carrying a priest's Eucharistic set. Features rigid protective walls and an ergonomic design for safe and comfortable transport. Decorated with embroidered Cross, emphasizing its sacred purpose.

FEATURES:

- Made of durable water-repellent polyester;
- Rigid walls provide reliable protection;
- Spacious main compartment with two auxiliary pockets for liturgical books and items;
- Includes a removable organizer panel with elastic bands and hook-and-loop fasteners;
- Large external front pocket for accessories;
- External pocket secured with zipper closure;
- Designated ID holder on the lower front panel;
- Equipped with two carry handles and a padded grip with brass snaps engraved «Pray and Serve»;
- Can be carried by hand or over the shoulder.

SNR-3n Priest's Vestment Bag

Designed for storing and transporting priestly or chaplain vestments. Combines durability, practicality, and thoughtful construction to protect garments even in adverse weather conditions.

Material: 600D polyester, synthetic leather, polyethylene foam.
Size: 50x35x10 cm.

FEATURES:

- Made of durable water-repellent 600D polyester;
- Rigid walls maintain shape and protect contents;
- Large main compartment with adjustable internal divider;
- Two internal pockets for service books (23 × 17 × 4 cm);
- Large external zippered pocket (49 × 27.5 cm) for documents and accessories;
- Front ID pocket with synthetic leather trim and transparent window;
- Removable shoulder strap;
- Two carry handles with padded grip and brass snaps engraved «Pray and Serve»

PRIESTLY

SNM-2 Mitra (Bishop's Headdress) Case

Material: 600D polyester, 8 mm polyethylene foam, cardboard.

Size: height — 24 cm, diameter — 26 cm.

A durable and practical case designed for safe storage and transport of a mitra, the liturgical headdress of bishops and priests. Maintains shape and appearance during transport.

FEATURES:

- Made of wear-resistant 600D polyester;
- Insulated walls with 8 mm foam and cardboard for shape retention;
- Rigid structure maintains form during long-term use;
- Zippered flap with dual sliders for easy access;
- Durable carry handle;
- Decorated with embroidered Cross highlighting its sacred purpose.

CSO-2 Vestment Garment Bag

Material: 210D polyester, PVC film.

Size: 155x74 cm. Pocket size: 35 x 32 cm.

A functional garment bag designed for storing and transporting clerical vestments. Protects garments from dust, dirt, and external damage during storage and travel.

FEATURES:

- Made of wear-resistant 210D polyester;
- Zipper closure for reliable protection;
- Hanger opening and hanging loop at the top;
- Cross image applied via silk-screen printing on the front;
- Transparent PVC ID pocket on the opposite side;
- Two spacious lower pockets for clergy accessories.

PRIESTLY

ODK-2 Chaplain Prayer Book Case

Material: 600D polyester, cardboard

Size: 19,5 × 15 × 3,5 cm

A semi-rigid case specifically designed to protect and transport a chaplain's prayer book. Ensures long-term protection and a neat appearance even under frequent use.

FEATURES:

- Semi-rigid construction with reinforced cardboard panels;
- Made of durable 600D polyester;
- Internal securing straps prevent accidental opening;
- High-quality zipper closure;
- Easy to clean;
- Webbing carry handle;
- Decorated with a brass snap engraved «Pray and Serve», emphasizing its spiritual purpose.
